

APPENDIX REPORTING IN OPSYS

An Intervention (also generally called project/programme) is the operational entity associated to a coherent set of activities and results structured in a logical framework aiming at delivering development change or progress. Interventions are the most effective (hence optimal) entities for the operational follow-up by the Commission of its external development operations. As such, Interventions constitute the base unit for managing operational implementations, assessing performance, monitoring, evaluation, internal and external communication, reporting and aggregation.

Primary Interventions are those contracts or groups of contracts bearing reportable results and respecting the following business rule: 'a given contract can only contribute to one primary intervention and not more than one'. An individual contract that does not produce direct reportable results and cannot be logically grouped with other result reportable contracts is considered a 'support entities'. The addition of all primary interventions and support entities is equivalent to the full development portfolio of the Institution.

Primary Interventions are identified during the design of each action by the responsible service (Delegation or Headquarters operational Unit).

The level of the Primary Intervention is defined in the related Action Document and it is revisable; it can be a(n) (group of) action(s) or a (group of) contract(s).

Tick in the left side column one of the three possible options for the level of definition of the Primary Intervention(s) identified in this action.

In the case of 'Group of actions' level, add references to the present action and other action concerning the same Primary Intervention.

In the case of 'Contract level', add the reference to the corresponding budgetary items in point 4.6, Indicative Budget.

Option 1: Action level		
<input checked="" type="checkbox"/>	Single action	Present action: all contracts in the present action
Option 2: Group of actions level		
<input type="checkbox"/>	Group of actions	
Option 3: Contract level		
<input type="checkbox"/>	Single Contract 1	
<input type="checkbox"/>	Single Contract 2	
<input type="checkbox"/>	Single Contract 3	
	(...)	
<input type="checkbox"/>	Group of contracts 1
